

HI-TECH MODERN HIGH SCHOOL

CBSE Affiliation No: 3630342

HITECH JUNCTION-JULY2026 EDITION

Investiture Ceremony

The school held its Investiture Ceremony on 1st July 2026, presenting flags, sashes, and badges to the newly elected student cabinet, who took an oath to uphold integrity, discipline, service, and leadership. A march past by the four houses—Pruthvi, Varuna, Vayu, and Agni—led by the House Prefects added grandeur to the event, attended by the prefects parents. The Ceremony was made even more special by the gracious presence of the parents of the prefects, whose encouragement and support added warmth and pride to the celebration.

Doctor's Day

"An apple a day keeps the doctor away." Pre-Primary students dressed as doctors and nurses and performed a role play to honor doctors, learning about kindness, care, and compassion in the medical profession. The Pre-Primary celebrated Doctor's Day with great joy and gratitude to honour the dedication and selfless service of doctors. The tiny tots came dressed as doctors and nurses, creating a lively and cheerful atmosphere.

Yellow Day

The Primary Section celebrated Yellow Day with enthusiasm, dressing in yellow and decorating classrooms with themed displays, balloons, and artwork, bringing energy and cheer to the campus.

Environment Awareness Rally & Nukkad Natak

Students of HMHS School, along with children from Asha Foundation, organized an Environment Awareness Rally at Army Quarters Phase 2. The rally promoted conservation, cleanliness, pollution reduction, and environmental responsibility. Class X students performed a meaningful Nukkad Natak on plastic pollution, deforestation, and climate change.

Menstrual Hygiene Awareness Session

Our school partnered with menstrual wellness brand Nua to host an impactful Menstrual Hygiene Awareness Session conducted by Dr. Deeba Illyas Ansari. The session aimed to break period stigma by explaining the biological menstrual cycle in a clear, scientific way. Dr. Ansari highlighted the critical importance of proper hygiene, such as using clean products and changing sanitary pads regularly to prevent infections.

Field trip to Birla Planetarium

Students of classes 2 to 5 recently enjoyed an exciting field trip to the Birla Planetarium. The visit gave them a wonderful opportunity to explore the wonders of the universe through an engaging show on stars, planets, and galaxies. Children were fascinated by the vivid visuals projected on the dome and eagerly asked questions about space, satellites, and the solar system. The trip not only added a fun break from regular classroom learning but also sparked curiosity and interest in astronomy among the young minds. Teachers accompanying the students ensured a safe and well-organized visit, making the experience both educational and memorable for all.

A Rainy Day at School

Today it rained at school! Dark clouds covered the sky, and raindrops fell — pitter-patter, pitter-patter! We could not play outside. Instead, we sang rainy day songs, danced with umbrellas, and drew pictures of clouds and rainbows. Teacher read us a story about a little duck. We had so much fun indoors!

Upcoming events
